Hi everyone thank you for this panel. Can someone review UO IRB situation - e.g. can graduate students and can we as P.I.s actively engage in human subjects research right now - is it institutionally-permitted? Even as travel is not yet institutionally-permitted? For graduate students, these are really important questions they're grappling with this summer.... thank you again!

TOMORROW, Wednesday, June 10 (10:30-11 and 11:30-12)

The OVPRI and research IMT group will be hosting virtual Town Halls to hear more of your questions and provide additional information. The second session will be more focused on human subjects research.

From Kristin Yarris to Everyone: 12:17 PM

okay!

From Erin Beck to Everyone: 12:22 PM

Kristin - from the vpri FAQ: Research with human subjects that does not include face-to-face activities may continue, but researchers need to implement precautions within the research team in alignment with UO announcements and restrictions.

Thx!

From stephenl to Everyone: 12:23 PM

Kristin: I will speak to this a little bit. I can send you my research plan which has two parts about remote research and then a very provisional part for face to face. We will have to update it and UO will go into another phase. Right now we have to think about not only Uo travel policies, research protocols and human subjects, but of course what it's actually like on the ground which is often very different from the general guidelines and requirements of UO.

From Kristin Yarris to Everyone: 12:23 PM

of course, thx!

The app signal is seen as one of the best for communication that is encrypted

From Bronwen Maxson-U Oregon (she/hers) to Everyone: 12:27 PM

+1 on Signal

From Kristin Yarris to Everyone: 12:29 PM

great points, Emily!

From Bronwen Maxson-U Oregon (she/hers) to Everyone: 12:39 PM

I grappled with some of these questions on my latest article - both positionally as well as methodology. My co-authors and I opted to send our manuscript to those we interviewed prior to publication for their review and comments.

From Erin Beck to Everyone: 12:39 PM

Great idea Bronwen

From stephenl to Everyone: 12:51 PM

How about having them interview each other?

From Audrey Lucero to Everyone: 12:52 PM

Maybe, Lynn, but they won't necessarily know each other since we're recruiting district-wide

Is there a way to consider the students in each district as a sort of cohort or class? First you work through zoom to create a sense of community with them, then do the discussion? I found

teaching on zoom that building community first can work.
Whatsapp audio diaries

From Bronwen Maxson-U Oregon (she/hers) to Everyone: 12:58 PM

I moved away from WhatsApp when Facebook bought it. As Erin mentioned, it's being used to scrape user data via Fb <https://www.bbc.com/news/technology-45956557>

From Ruby Batz Herrera to Everyone: 12:59 PM

Thank you so much, this conversation was very helpful to better inform my local and international research.

Most platforms do surveillance to some degree, unfortunately.

This has been super informative, Thanks!

Here's some info about Signal for consideration. "Signal uses is available under an open-source license, so experts have had the chance to test and poke the app to make sure it stays as secure as what's intended." <https://www.wired.com/story/ditch-all-those-other-messaging-apps-heres-why-you-should-use-signal/>

This one is a bit more recent <https://www.fastcompany.com/90335034/if-you-value-your-privacy-switch-to-signal-as-your-messaging-app-now>
